**Subject: Regarding eligibility criteria for pipeline works.**

During TAC meeting held on 26.08.2018, it has come to notice that each Division/Unit is inviting tenders of pipeline works with different eligibility criterias and uniform pattern is not being followed in these type of works. In order to streamline the procedure of eligibility criteria of Bidders for pipeline works on uniform pattern the following decisions have been taken by the TAC:-

1. If the weighted average diameter of pipeline work as per the approved estimate is equal to or more than 500 mm then the eligibility criteria followed shall be as per clause 4.2 (ii) (A) (C) with the additional condition to be mentioned in the DNIT that  
*The Contractor should have atleast executed 50% of the estimated length having diameter of Pipeline 500mm or more.*  
*(Suppose D1, D2 and D3 are the required diameter of pipeline having length L1, L2 and L3 than the weighted average can be calculated as*  
$$\text{Weighted average diameter} = \frac{D1 \times L1 + D2 \times L2 + D3 \times L3}{L1 + L2 + L3}$$
2. If the weighted average diameter of pipeline work as per the approved estimate is less than 500 mm then the eligibility criteria followed shall be as per clause 4.2 (ii) (A) (C) with the condition that  
*The Contractor should have atleast executed 50% of the estimated length of pipeline works. (Diameter shall not be mentioned in the DNIT)*
3. The other conditions of Standard Bid Document will remain same.
4. The tender which are yet to be opened after the date of issue of this letter shall follow these instructions by issuing corrigendum or tenders be re-invited with change in conditions mentioned above.
5. These instructions came into force with immediate effect and shall be followed in letter and spirit.

  
Executive Engineer/Works  
for Engineer in Chief, Irrigation and W.R.  
Department, Haryana, Panchkula
